

Sainath Regulagadda

Computerized Systems Validation | Digital Quality Systems

Risk-Based Software Assurance for medical-device and life-sciences environments

Texas, United States • LinkedIn • Portfolio

12+ YEARS

REGULATED SYSTEMS

PROFESSIONAL PROFILE

Quality systems and validation professional with more than 12 years of experience across medical-device, pharmaceutical, and life-sciences environments. Experience includes computerized systems validation, computer software assurance, validation lifecycle management, change control, risk assessment, and quality-system improvement for enterprise and regulated applications.

ASSURANCE

CSV, CSA and validation lifecycle management

SYSTEMS

SAP, Salesforce, Propel and RegDesk

QUALITY

Risk, change control and evidence

CURRENT EXPERIENCE

Senior QS Validation Engineer

DEC 2021 - PRESENT

Advanced Bionics, part of Sonova

Medical devices

- Contribute to validation and software-assurance activities for enterprise and quality systems, including SAP, Salesforce, Propel, and RegDesk.
- Connect requirements, risk assessments, test evidence, traceability, and validation conclusions across the system lifecycle.
- Support change-control and release-readiness decisions through review of proposed changes, validation impact, testing, and post-release verification.
- Collaborate with Quality, IT, business owners, project teams, and system stakeholders to clarify responsibilities, evidence, and next steps.

PROFESSIONAL APPROACH

Start with intended use. Focus assurance effort on what matters most. Connect requirements, risk, testing, and traceability so that decisions are clear and evidence is useful.

CORE EXPERTISE

CSV & CSA

Risk-based assurance and lifecycle evidence

VALIDATION EVIDENCE

Requirements, testing and traceability

CHANGE READINESS

Impact assessment and post-release checks

QUALITY SYSTEMS

Data integrity, CAPA support and procedures

CREDENTIALS

ASQ CSQE

Issued Oct 2024 | ID 6923

ASQ CMQ/OE

Earned Sep 2026

AAMI TRAINING

Production & Quality System Software | Nov 2024

VERIFICATION

ASQ Certification Registry
LinkedIn profile

EARLIER EXPERIENCE

Computer System Validation Engineer

AUG 2016 - NOV 2021

Total Validation Services Inc.

Life sciences consulting

- Authored and reviewed validation plans, requirements, risk assessments, qualification and user-acceptance protocols, traceability matrices, periodic reviews, decommissioning records, and validation summary reports.
- Supported implementation, upgrade, qualification, and maintenance of GxP computerized systems and laboratory or manufacturing equipment.
- Coordinated with Quality, business teams, and vendors to resolve technical issues and maintain controlled validation evidence.

Validation Associate

JAN 2012 - NOV 2014

Tata Consultancy Services

Medical-device validation

- Developed validation plans and IQ, OQ, and PQ protocols for equipment and software-based systems.
- Supported quality-assurance documentation, standard operating procedures, and validation of PLC and human-machine-interface applications.

EDUCATION

- **Master of Information Technology and Management** 2018
Campbellsville University
- **Master of Science in Computer Science** 2016
San Francisco Bay University
- **Master of Business Administration** 2013
Sikkim Manipal University
- **Bachelor of Technology, Electronics and Instrumentation Engineering** 2011
JNTU

DEVELOPMENT WORK

Digital Validation System - a personal concept in development exploring a connected workflow for requirements, risk assessment, test evidence, traceability, and review. It is not a production-ready or validated commercial product.

TECHNICAL KNOWLEDGE

VALIDATION

21 CFR Part 11 and Part 820; ISO 13485; GAMP; GxP; validation planning; IQ/OQ/PQ; requirements; risk assessment; test design; UAT; regression testing; traceability; audit trails; gap analysis; remediation.

ENTERPRISE SYSTEMS

SAP; Salesforce; Propel; RegDesk; ValGenesis; Jira; ServiceNow; TrackWise; Maximo; DeltaV; DocuSign; Microsoft Office; Access; Visio.

DELIVERY MODELS

Waterfall, V-model, and Agile approaches adapted to regulated system lifecycles.

EVIDENCE FOCUS

Requirements, risk assessments, test protocols, execution evidence, traceability, summary reports, and release readiness.

PUBLIC PORTFOLIO
