

Sainath Regulagadda

Computerized Systems Validation | Digital Quality Systems | Risk-Based Software Assurance

Texas, United States | [linkedin.com/in/sainath-r-739102129](https://www.linkedin.com/in/sainath-r-739102129) | sainathregulagadda.github.io

Professional Summary

Quality systems and validation professional with more than 12 years of experience across medical-device, pharmaceutical, and life-sciences environments. Experience includes computerized systems validation, computer software assurance, validation lifecycle management, change control, risk assessment, and quality-system improvement for enterprise and regulated applications.

Core Expertise

CSV and CSA	Validation planning, intended-use analysis, risk-based assurance, and lifecycle documentation
Validation evidence	Requirements, risk assessments, test protocols, traceability, execution evidence, and summary reports
Enterprise systems	SAP, Salesforce, Propel, RegDesk, and regulated business applications
Quality systems	Change control, release readiness, data integrity, CAPA support, procedures, and process improvement

Professional Experience

Advanced Bionics, part of Sonova Senior QS Validation Engineer

December 2021 -
Present

Medical devices

- Contribute to validation and software-assurance activities for enterprise and quality systems, including SAP, Salesforce, Propel, and RegDesk.
- Connect requirements, risk assessments, test evidence, traceability, and validation conclusions across the system lifecycle.
- Support change-control and release-readiness decisions through review of proposed changes, validation impact, testing, and post-release verification.
- Collaborate with Quality, IT, business owners, project teams, and system stakeholders to clarify responsibilities, evidence, and next steps.

Total Validation Services Inc. Computer System Validation Engineer

August 2016 -
November 2021

Life sciences consulting

- Authored and reviewed validation plans, requirements, risk assessments, qualification and user-acceptance protocols, traceability matrices, periodic reviews, decommissioning records, and validation summary reports.
- Supported implementation, upgrade, qualification, and maintenance of GxP computerized systems and laboratory or manufacturing equipment.
- Coordinated with Quality, business teams, and vendors to resolve technical issues and maintain controlled validation evidence.

Tata Consultancy Services Validation Associate

January 2012 -
November 2014

Medical-device validation

- Developed validation plans and IQ, OQ, and PQ protocols for equipment and software-based systems.
- Supported quality-assurance documentation, standard operating procedures, and validation of PLC and human-machine-interface applications.

Certifications and Training

ASQ Certified Manager of Quality / Organizational Excellence (CMQ/OE) - Earned September 2026

ASQ Certified Software Quality Engineer (CSQE) - Issued October 2024; LinkedIn lists credential ID 6923 and expiration in December 2028

AAMI Production and Quality System Software - Training/certificate issued November 2024

Verification: ASQ Certification Verification Registry

Education

Master of Information Technology and Management - Campbellsville University, 2018

Master of Science in Computer Science - San Francisco Bay University, 2016

Master of Business Administration - Sikkim Manipal University, 2013

Bachelor of Technology in Electronics and Instrumentation Engineering - JNTU, 2011

Selected Technical Knowledge

Validation: 21 CFR Part 11, 21 CFR Part 820, ISO 13485, GAMP, GxP, validation planning, IQ/OQ/PQ, requirements, risk assessment, test design, UAT, regression testing, traceability, summary reporting, audit trails, gap analysis, and remediation.

Systems and tools: SAP, Salesforce, Propel, RegDesk, ValGenesis, Jira, ServiceNow, Microsoft Office, Access, Visio, TrackWise, Maximo, DeltaV, and DocuSign.

Delivery models: Waterfall, V-model, and Agile approaches adapted to regulated system lifecycles.

Development Work

Digital Validation System - a personal concept in development exploring a connected workflow for requirements, risk assessment, test evidence, traceability, and review. It is not presented as a production-ready or validated commercial product.

This public resume excludes personal contact details, confidential project records, internal identifiers, and nonpublic employer information.
